CHINA-FRANCE “BLOCK TRAIN”: NO SHORTAGES CURRENTLY REPORTED

We are analysing the situation regularly and adapting as required.

We can confirm the fact that our “block train” (from Wuhan to Dourges) has not run since December. There are two reasons for this: the recent strikes in France, coupled with the usual slowdown in activity in China, due to Chinese New Year. We were able to anticipate supplies for our Spring/Summer collections.

In any case, since 19 February, the business has continued to route its products from China by using public trains leaving from Chengdu station. Products arrive in Germany and are then dispatched by road across other European countries.
